- Next.js, React, Redux, Mobx
- Jest, RTL
- Webpack, ViteJS
- Axios, REST, SWAGGER
- BEM, Bootstrap
- NPM, Yarn, Git

LANGUAGES

- Russian - Native speaker
- English - B1+ (desire to growth)

WORK EXPERIENCE

Front-end developer
Dev.family
October 2022 to May 2023
- Implemented many pages with adaptive design based on layouts and specifications.
- Implemented various interactive functionality (burger-menu, navigation, custom scrollbar, popup, etc.).
- Implemented authentication and registration with Redux and JWT.
- Worked with media (custom video player, image optimization, etc.)
- Optimized existing code and added new logic.

Front-end developer
NDA
July 2023 until now
- Developed in-house component library for the company, focusing on optimization and testing of each component.
- Developed documentation for products under development.
- Developed interactive multi-page forms using RHF, as well as client-side data validation logic using Yup
- Along with adding logic to existing parts of the project, implemented full-fledged pages with new logic and adaptive design based on mockups and specifications.
- Refactored the code, which significantly reduced the build time of the application, as well as generally improved performance.

EDUCATION

Belarusian State University of Informatics and Radioelectronics
Faculty of Computer Technology

Specialication: Programmable mobile systems

Year of Graduation: 2022

RS.school JS/Front-end course
EPAM
March 2021 to September 2022
During the course, I completed various projects using JS/TS, various libraries and tools. for example, commercial websites, news resources, browser games, a service for learning foreign languages and much more. Examples of my work:
